PROFESSIONAL SUMMARY

Brand-minded Web Designer with 2+ years of experience designing for screen across web and digital products. Skilled in building design systems, structuring visual hierarchy, and crafting interfaces optimized for conversion. Combines design expertise with frontend development knowledge (HTML, CSS, basic JavaScript) to work closely with developers, manage clean handoff, and oversee QA throughout the build process. Proficient in wireframing, prototyping, design validation, and market analysis. Certified in UX design by Google and IBM. Currently pursuing a B.Tech in Computer Science Engineering with an expected graduation of June 2026.

CORE COMPETENCIES

Web & Brand Design: Web Design · Brand Identity & Systems · Visual Hierarchy · Conversion-Focused Design · Responsive Design · Design Systems

Frontend Development: HTML · CSS · JavaScript (Basics) · Responsive Web Development · Website Development · Cross-browser Compatibility

Design Skills: User Interface Design · Wireframing & Prototyping · User Research · Design Validation · Design Thinking · Design Production

Research & Strategy: Market Research · Market Analysis · Customer Experience · Competitive Analysis · User Personas · Customer Journey Mapping

Dev Collaboration: Developer Handoff · QA Management · Design-to-Code Implementation · Cross-functional Team Collaboration · Agile/Iterative Design Cycles

Tools & Software: Figma · Adobe XD · Prototyping Tools · Wireframing Tools · VS Code · Git/GitHub

PROFESSIONAL EXPERIENCE

Freelance UI/UX Designer | Self-Employed | Remote

Jan 2026 – Present

- Designed brand-aligned web interfaces for clients across various industries, applying visual hierarchy and conversion-focused layouts to responsive web and mobile screens.
- Built scalable design systems and component libraries, ensuring visual consistency and faster iteration across client projects.
- Managed full project lifecycle independently—from client briefings and wireframing through high-fidelity prototyping and developer handoff—leveraging HTML/CSS knowledge to produce dev-ready specs and coordinate QA for pixel-accurate builds.
- Conducted user research and usability testing to refine prototypes, balancing brand expression with functional, conversion-driven design.

Product Designer Intern | Kodabyte Technologies | Thrissur, India

Mar 2025 – Nov 2025

- Crafted high-fidelity mockups, user flows, icons, and illustrations for screen-based interfaces, applying clear visual hierarchy to improve usability and streamline the user experience.
- Developed user stories, customer journey maps, and personas to inform structured, system-driven design decisions.
- Assessed feasibility of design concepts by evaluating visual aesthetics, brand consistency, and market fit, informing data-driven design decisions.
- Established design production procedures and oversaw implementation, applying frontend development knowledge (HTML/CSS) to communicate effectively with developers and manage clean handoff.

Product Designer Intern | Levantate Labs | Cochin, India

Oct 2024 – Feb 2025

- Worked closely with developers to manage design handoff, collaborating with a cross-functional team of designers, marketers, and stakeholders to drive feature design decisions.
- Conducted rigorous manual QA testing against defined acceptance criteria to uphold quality standards throughout the product development lifecycle.
- Facilitated structured brainstorming sessions, generating innovative ideas for new product features and fostering a culture of creative problem-solving.

UI/UX Designer Intern | Markets Mojo | Mumbai, India

Jul 2024 – Oct 2024

- Optimized screen-based design compatibility across multiple platforms (web, mobile, tablet), maintaining consistent visual hierarchy and a seamless cross-platform user experience.
- Documented product requirements and design decisions, providing developers with a clear reference for accurate handoff and implementation.
- Conducted competitive research on industry trends and rival products, translating findings into actionable design strategies and recommendations.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science Engineering

Expected Jun 2026

Christ College of Engineering | Thrissur, Kerala

Higher Secondary Education (Science Stream)

May 2022

St. Mary's HSS | Thrissur, Kerala

CERTIFICATIONS

- Google UX Design Professional Certificate – Google (Coursera)
- IBM UI/UX Designer Professional Certificate – IBM (Coursera)
